I won't be your superman for free
You're gonna have to make me want to fly
You're gonna have to show your soul to me
And make me want to reach down deep inside

I won't be your savior for a song
And I won't back a cause that isn't right
What good can come if everything is wrong
We wouldn't last a lifetime
A lifetime or a night

Give me something to dream on
Something to beam on
A reason to try
Won't you tell me what love takes
Baby bring on the heartache
Crack open this sky
Make it cry

I won't be your superman for free
And I won't make your world all right for you
Til the vision in these x-ray eyes
Tells me that you love me too
