She waited till I left for work to move all of her stuff out
The anger that comes over you when you feel you've
been left out

She said it wasn't me, she had some things to do
I see now that it wasn't me as much as it was you
*If you have to go, go quickly
Cause my ego's on the fence
It's hard to know you won't miss me

I know that night went downtown, you said nothing was
wrong
It's funny how we always feel it when we don't belong
When we ran into him, you said "he's only just a friend"
"Don't you act so jealous baby." But now look how it
ends

*So if you have to go, go quickly
Cause I'm waking up from tortured dreams
When she left the way she kissed me
Oh..

Faith, in icy eyes and love gone cold
Faith, can break your heart to save your soul
Faith, I sometimes wonder what the use is
Faith, In every one of my excuses

I'll drive around here endlessly thinking about her
The places that we used to go, where we'd hang out
down by the water
If I should see you guys out, just act like you don't know
me
I don't want to act proud, but since you left I've
changed completely
