Verse 1

I'm sitting here
Don't mention about the times when you told me
That you and I were one
I remember every word you said about me babe

There's something strange
When I look into your eyes
I can tell that I'm not the only one
No I'm not the only one you love now

Bridge

It was the best thing yet
You forgot that you called out her name
When you were in your bed (oh yeah baby)

Now I know that I have to let go
I've made up my mind
That you're wasting my time
I really really really need to know now baby

Chorus

Who do you love
And does she love you the way that I do
Oh tell me
I really really really need to know now baby
Who do you love
And did you tell her you were loving me too
Oh tell me
I really really really need to know now baby

Verse 2

And does she know
That you said all the same things to her
That you told me baby
Did you tell her exactly what you told me

And did you give her love
In the same way you gave me love
And then you went and walked away
Did she turn around and walk away now

Bridge

Did you think that your love was so fine
It was the best thing yet
You forgot that you called out her name
When you were in your bed (oh yeah baby)

Now I know that I have to let go
I've made up my mind
That you're wasting my time
I really really really need to know now baby

Chorus

Who do you love
And does she love you the way that I do
Oh tell me
I really really really need to know now baby
Who do you love
And did you tell her you were loving me too
Oh tell me
I really really really need to know now baby

Bridge

No more second chances
Undercover romances
I know it's time to move on baby
Oh baby baby

You told me so many lies
Every time I look in your eyes
I know I can't believe you
Who do you love

Who, who do you love
I really need to know now baby
Oh did you tell her
You've been loving me
I really really really need to know now baby

Chorus

Who do you love
And does she love you the way that I do
Oh tell me
I really really really need to know now baby
Who do you love
And did you tell her you were loving me too
Oh tell me
I really really really need to know now baby
