"Wind It Up"

Visit "[Wind It Up](#)" on MotoLyrics.com

Close the mockers world
Planets in the same room
Sentimental girls
All of which had fame too
Already gone
Oh but they can't leave you
Fight their clinging on
Fight but they can't be you
All this time they're wasting my rhymes
Do you know what it is
Makes you say those things
Or why you have a problem
With what we bring
Oh i'm sorry we believe in more
Than just luck
Its not meant to offend you
Just for us
We know that you gotta feel important
But it's a shame that your ignorance
Is all you're flaunting
Your insecurities out
When you say we got no shot
Met thousands like you
And we know they wont stop
What if i would wind it up
What if i could wind it up
What if i should wind it up
What if i could
Do you know a damn thing
About what you are saying
You think you're in control
But your gigs about to fold
Your insecurities out
When you say we got no shot
Met thousands like you
And we know they wont stop
We don't mind 'cause we know
What we're searching for
Its the time in our life we've been working for
We don't feel elite when we're doing this
Anyone can do it if you just take a risk

Its not just us that you're talking down to
I've heard you say the same
To everyone around you
What if i would wind it up
What if i could wind it up
What if i should
Now i'll tell you mr. know-it-all
What you can do with all your worldly knowledge
You can take your business
And opinions
And your mushrooms
And shove it up your..
All this time they're wasting my rhymes
What if i would wind it up
What if i could wind it up
What if i should wind it up
What if i could
Do you know a damn thing
About what you are saying
You think you're in control
But your gigs about to fold
