WHAT'S THE MATTER WITH ME

(Deborah Allen - Rafe VanHoy - Don Cook)

You only get around to me when someone else has
said goodbye
Somehow you only want the ones who noly going to
make you cry
It seems no matter what you do you never get their
loving affection
It should be obvious to you you're looking in the wrong
direction

What's the matter with me
What do I have to do to make you see

Just how good it could be
If it's really love that you need
What's the matter with me

When you're lying in my arms waiting for your heart to
feel
How can you be so close to me and not know the way I
feel
You say it makes you feel so good to know you can cry
on my shoulder
I must really be a fool to let it happen over and over
