Calling on the follow-through, to save us from this  
wasted youth. Calling on the follow-through  
Let's begin the follow-through, more than ever I  
needed you. Let's begin the follow-through

Start, start to stop like this and now you know you'll  
never miss, everything you've started for it waits to  
very long  
Start, start to hit the fire, one moment, one desire  
everything you know right now will never break just who  
you are

This is for all of the weakness, with you in my life  
Ya it's no surprise that now I'm stuck like a bird out on a  
wire  
You know its right, and you close your eyes for the  
second time

Calling on the follow-through, to save us from this  
wasted youth. Calling on the follow-through  
Let's begin the follow-through, more than ever I  
needed you. Let's begin the follow-through

Stop, Stop, and start to fight, one more moment, one  
more night. Everything you've waited for it ended in a  
dream  
Stop, Stop, you'll never miss one moment your first  
kiss, everything you know right now is bending and  
your done

One, two, three your on your third strike, you'd better  
get this right  
You're the only one I've ever needed so be the one I  
needed more  
It's all about the follow-through, to life us from your  
wasted youth  
Let's begin the follow-through, more than ever I  
needed you
