If I stepped into your skin
Would I really feel what lies within
Or would I see some other kind of you
If I told you that I've changed
If I promised you the love we made
Moved in me, like it moved in you

All I am is you
(Only ever really wanted you
Only ever really needed you too)
Say I am with you
(Every minute every day with you,
Let me see, let me know I can make it though)

If I told you that I'm scared
If I showed you that the scars I wear
Never heal, they just conceal the pain
If I have one truth to take
If I watch the thread of beauty break
One thought remains as words I cannot say

All I am is you
(Only ever really wanted you
Only ever really needed you too)
Say I am with you
(Every minute every day with you,
Let me see, let me know I can make it though)

If I told you I can't live without you
if I showed you that I'd die without the
Kind of love that shines above my eyes

All I am is you
