Doctors today are doing incredible things  
They can rebuild your knees with implanted metal and  
springs  
If you're losing your hair or need intensive care ...  
Each day's morning paper, a new development brings

Doctors today have really progressed  
Our medical care is surely the best  
For every disease there's a diagnostic test  
But when they come up with the cure for heartache  
When they come up with the cure for heartache  
When they come up with the cure for heartache  
... then I'll be impressed

Doctors today can add 15 years to your life  
And when your skin starts to sag you can always go  
under the knife  
If your cat makes you sneeze or your dog gives you  
fleas  
Why there's even a pill to help a man make love to his  
wife

Doctors today have really progressed  
Our medical care is surely the best  
For every disease there's a diagnostic test  
But when they come up with the cure for heartache  
When they come up with the cure for heartache  
When they come up with the cure for heartache  
... then I'll be impressed

Someday there'll be an answer for each kind of cancer  
And when it happens, I'll offer a toast  
But the kind of cure of which I'm less sure  
Is the one that the world needs the most
