"Dust"

Visit "[Dust](#)" on MotoLyrics.com

Time they call the universal healer
But you're back
Every three days
Settling all around me
A feather duster's no substitute
For the real thing
And the dust you left behind
Is settling still

When you don't ever taste it so good
Swept up like debris on a Saturday night
Did we ever have fun ?
And the dust, the gentle legacy you left behind
Is falling softly on my mind
Dust, the timeless memory of you,
I love you... I do,
For all the little things you do
And I guess I always will (hmm)
The dust settles again
To remind me still
Of the memories
I've cherished so long

Hold me still close to your side
'cause my love
Won't decay anymore
Memories are hope for those long summer days
And the dust you left behind
Is settling still

When you don't ever taste it so good
Swept up like debris on a Saturday night
Did we ever have fun ?
And the dust, the gentle legacy you left behind
Is falling softly on my mind
Dust, the timeless memory of you
I love you... I do,
For the little things you do
And I guess I always will (hmm)
The Dust settles again
To remind me still

Of the memories
I've cherrished so long

Feeling your body stretched so long,
What was it went so wrong,
That our love, our love it was gone, oh it was gone
But our friendship going strong, going strong, going
strong oh
Going strong, going strong
(hmm)x2

Feeling your body stretched so long,
Stretched so long,
What was it went so wrong, went wrong,
That our love, that our love it was gone, gone, gone,
gone, gone,
But our friendship going strong, going strong,
Oh ! going strong,
Going strong, going strong
(hmm)x2
