Come in base Iâve landed my ship on a planet here in
space
This is the one they say is inhabited by the human race
And Iâm going out to look around and see whatâs
here
And Iâll tell you what I find
Confirmation on the inhabitants theyâre running
everywhere
And their technology is beyond what Iâve seen
anywhere
But Iâm trying to communicate and they donât hear
me
It seems like for all Iâm finding
I canât find the most important thing

Where are the signs, where are the signs of life
The love that proves there is a beating heart inside
Where are the signs, where are the signs of life
The compassion and concern that makes this world
turn
Where are the signs of life

Now, Iâve got crayons rolling around in the floorboard
of my car
Bicycles all over my driveway, bats and balls all over
my yard
And thereâs a plastic man from outer space sitting in
my chair
The signs of life are everywhere
But Iâve got questions rolling around in the corners of
my mind
If itâs true I live in a world where hope has all but died
And if I really have a living love alive in me
How am I letting it be known, how am I letting it be seen

These are the signs, these are the signs of life
The love that proves there is a living faith inside
These are the signs, these are the signs of life
The compassion and concern that makes this world
turn
These are the signs of life

[Solo]

These are the signs, these are the signs of life
The love that proves there is a living faith inside
These are the signs, these are the signs of life
The compassion and concern
That's gonna make this world keep turning
These are the signs of life
A love that's flowing from the heart
Where the grace of God has left its mark
These are the signs of life
The reaching out of a servant's hand
The giving that makes no demands
These are the signs of life
This is loving proof of the faith inside
These are the signs of life
