Danny, I can't breathe,
Every thought in my head is you,
I can't eat,
simply I can't be..

Forgetting you is harder than it seems..

You and I were meant to be,
You're the smile,
you're the song,
you're the one I thought would never come..

You're my zombie doll,
you're my heart and soul,
you're the ring around my finger...

But now I've let you go,
now you've gone away..

But now, I've let you go, now you've gone away..

Baby, I miss you.
Sweetness, I need you.
When you listen to this....

Think of July,
think of the moon,
think of our first kiss..

Danny, I can't breathe,
Every thought in my head is you..
