

## Deceased "Beyond Science"

Visit "[Beyond Science](#)" on [MotoLyrics.com](https://MotoLyrics.com)

For it's still out there waiting for man  
To bring the living to death  
What's to stop these ghouls of gore  
From eating all our birth  
Beyond science stands the answer  
To which there is no cure  
No hidden saving antidote  
Waiting for this world  
We're reaching out so please take our hands  
We're living hell right here on the earth  
We're crying tears for all our life-long pains  
And screaming out "save us from the dead"!  
Terror unleashed came without sound  
The dead crept out of their graves  
Horrible creatures returning to kill  
As graveyards open their gates  
Is it pure evil is it a warning  
Of what the earth's to become?  
Is religion the key to end the attack  
Or will we just die one by one?  
Think to the past at all that man has done  
The power of sin and greed its ugly head has shown  
And maybe it only serves us right that we shall die  
today  
A morbid lesson to the world for all our evil ways  
Infection slowly setting in our souls are out of time  
The errors of our lust for gain have finally claimed  
mankind  
Do we deserve to live?  
Life is fading fast  
Do we deserve to live?  
We beg to know at last  
Do we deserve to live?  
Our lives our fading fast  
Do we deserve to live?  
Forever think to the past!
