In your mind defeat out of time, there's no more left
A morbid rush the growing fear a sudden flash and the
end is
here
A time to worry and a time to die unstable earth has
said
goodbye
Goodbye...
Chaotic seizures fill our brains, convulsions steal our
soul
Morbid battle of extinction, the hatred it unfolds
Universe of betrayal hidden by decay
Violent ending now in sight eroding us away...
Distant is the end at last the final call
Explicit horror is unleashed to evacuate our soul
A growing menace fading now survival seems unreal
Death is moving dosing in waiting for the kill...
Yes, Armageddon is intact and it has come to there
Forever buried in a trance to never be set free...
Distant is the end at last the final call
Explicit horror is unleashed to evacuate our souls
A growing menace fading now survival seems unreal
Unplugging cards stopping life death is soon revealed
Fading survival!!
