and so they justify to wash these dirty hands
and now we cut their throats
and so they justify only this can hold us together
only this can hold us together
only this can hold us together and so they justify
and now we've cut our throats and so we hold them
back
and now I know just why only this can hold us together
only this can hold us together
only this can hold us together
strength inner peace complicate incomplete
hold us hold us close in Your arms
where nothing is cold where nothing is cold life

this is all we've got
this is all we've got life
this is all we've got
this is all we've got life
this is all we've got
this is all we've got life
this is all we've got
this is all we've got only

this can hold us together only
this can hold us together only
this can hold us together only
this can hold us together only
this can hold us together only
this can hold us together
