

Still Breathing

"With Hateful Pride"

Visit "[With Hateful Pride](#)" on MotoLyrics.com

Our vision our one will begins to fall it is dead we're left
to decide on our own soaked with the red blood of the
innocent it's our future that's dying made to love by
design we've chosen this ignorance this lifeless path
alone this way is not our own we use bloodshed for
glory must expose this sick truth we must find soaded
with the red blood of the innocent it's my future that's
dying not without alone I feel empty I'm nothing to take
eternal blame we've been blind for too long infection
has set in if we could just unite then to form a plan and
to take a stand push this strife away if we could show
compassion from within our hearts rise as one to
recognize and give it all away expose this lie I use my
mind I use my mind I use my mind destruction
oppression our vision depression affliction I want to
know religion tradition what weakness recession
infliction what lies to feel life location forsaken to
reality feel life our hearts are dead I really I really I
want to know i really I really I want to know I can see
clearly nothing held against me overcoming hate
overcome push away throw away give away with
hateful pride with hateful pride with hateful pride is our
death it's our future that's dying made to love by
design we've chosen this ignorance this lifeless path
alone with hateful pride
