Visit "[Sedation](#)" on MotoLyrics.com

Space and time all fall behind
Strange machines to soothe my mind
Resting this sensory sleep keeps me confined
Recalling a memory undefined
Repressive sedative restraint
The image of myself erased
Distant voices redicate
Colored screenshots will sedate
Following
Into this spiral descent, it is pulling me in
Salvation
Lies on the other side
Sedation
Whispering unfocused unaware memories
Stays with me
Singing it's powerful sedative song to me
Silent witness set aside
Let all beauty pass me by
This solid liquid-live display
Surrounds me everywhere
Sedation keeping me at bay
Keeping me unaware...
Following
Into this spiral descent, it is pulling me in
Salvation
Lies on the other side
Sedation
Whispering unfocused unaware memories
Stays with me
Singing it's powerful sedative song to me
Space and time all fall behind
Strange machines to soothe my mind
