### "Forevermore"

Visit "[Forevermore](#)" on [MotoLyrics.com](https://MotoLyrics.com)

We are the wind and the rain from above  
We cast no shadows as we face the sun  
In the morning I'll be there with you  
We have conquered, the world is at our feet

We have the answers for all that we have ever  
dreamed  
We will be forevermore

We watch the stars and touch the warmth that they  
bring  
We see the waters reflect all that it sees  
We've seen the tears come from all around  
They just don't know what it is we've found

We have the answers for all that we have ever  
dreamed  
We will be forevermore

We will be as one for that's what we've become  
And we will stand alone as far as time is known  
Silence all around, peace is what we've found  
We will be forevermore

We are the wind and the rain from above  
We cast no shadows as we face the sun  
In the morning I'll be there with you  
We have conquered, the world is at our feet

We have the answers for all that we have ever  
dreamed  
We will be forevermore
