Superman Is Dead
"Code Red"

Code red, this is an emergency
In bed, temperature's at 103
It's love and my heart just went critical
How could I know, when we met the first time (I'll never forget)
You could make my chemistry change forever
I never knew, when I got your number (on the back of my hand)
I'd be needing to dial 911 straight after
No use trying CPR
This thing has gone too far
It's touch and go
Only you can save me now
CHORUS
Code red, this is an emergency
In bed, temerature's at 103
The doctor say that only a miracle
Can stop my BP getting way too high
I'n shock, pulse 225
It's love and my heart just went critical
How could I know, I had no resistance (taking me down)
Every night without you my vital's weaken
So won't you give me the thing I'm missing (need you around)
Every hours you're away, my condition deekens
Anything but mouth-to-mouth
Isn't gonna help me out
It's touch and go
Only you can save me now
CHORUS x 2
