Sky's bright & we're just alright
Looking good with all our best friends
We will own the city today
Kutaforia here we go...

Boys and girls on their lowriders
And the cops just don't know what to say...
On the street of saints and sinners
Before the sunset turns to black...

We know what we're made of
This kustom-kulture rage
And with pride we'll wear them until the end

We'll kruise around, forever on lowriders
We'll kruise around, punkrock songs in the air
We'll kruise around, forever on lowriders
Chopper, kruiser bmx all together now!

In the rain we'll kruise still
In the night forever will
It's the only we know
We will live and die this way
Brother sister let it go
Kustomize your world today
Coz tomorrow may never comes for you...
(Never comes for you [3x])

We'll kruise around, forever on lowriders
We'll kruise around, punkrock songs in the air
Chopper, kruiser bmx all together now!

Sky's bright & we're just alright
Looking good with all our best friends
We will own the city today kutaforia
Kutaforia here we go...
Kutaforia here we go...
This kruise will lasts forever...
