"Miracle"

Visit "[Miracle](#)" on MotoLyrics.com

It's a miracle, your sense of timing
It's a miracle, your sense of hearing octaves
It's impossible, your brain is floating
It's impossible, your cells are starting over

It's way too possible to drop a drum track
Power the patterns by keeping the patterns
It's way too possible to jump and drop down
Power the patterns by keeping the patterns

Beats are static, don't break it down, hearts are
beating all right
Beats are static, like one, two, keeps repeating all night
Beats are static, it's not that hard, keep it even and
tight
Beats are static, like three, four, keeps repeating all
night

Unbelievable, what your ears are hearing
Unbelievable, vibrations hitting bones
Undeniable, what your bones are feeling
Unassailable, sensing perfect tones

It's way too possible to drop a drum track
Power the patterns by keeping the patterns
It's way too possible to jump and drop down
Power the patterns by keeping the patterns

Beats are static, don't break it down, hearts are
beating all right
Beats are static, like one, two, keeps repeating all night
Beats are static, it's not that hard, keep it even and
tight
Beats are static, like three, four, keeps repeating all
night

Beats are static, beats are static, beats are static,
beats are static
Beats are static, beats are static, beats are static,
beats are static
Beats are static, beats are static, beats are static,

beats are static

Beats are static, don't break it down, hearts are
beating all right
Beats are static, like one, two, keeps repeating all night
Beats are static, it's not that hard, keep it even and
tight
Beats are static, like three, four, keeps repeating all
night

Beats are static, don't break it down, hearts are
beating all right
Beats are static, like one, two, keeps repeating all night
Beats are static, it's not that hard, keep it even and
tight
Beats are static, like three, four, keeps repeating all
night
