(Bleecher/D'Aime)

I never know your name
I never saw your face
Where is it you came from?
Was it some other place?
Where is it you came from
Out of time, out of place
When I looked at your face

[Chorus:]

And I knew we were together before
We haven't met before today
I recognized you, you're the one I love
At least a thousand yesterday
And I knew that I've been waiting
For what seems the longest time
From the moment we'd be back together
Together for all time

I didn't know you came
I never felt a trace
That your faith determined
Out of time, out of space
Until fate determined
In this time, in this place
That I looked at your face

[chorus]

When did we lived before?
Where did you share my life?
Were we friends or brothers?
Were we husband and wife?
Were we more than lovers
As we are in this life
When I last saw your face

[repeat chorus x3 to fade]
