Cluster of cell in sectional movement
Adapted to motion of system
Creating bionic system
Controlled by central office

Concentration is predestined
To produce the temples of control
Your value is in the essence
Of perfect cromozone

Genetic-rat-ion

Coded rating in the archives
Is cultivating useful chain
Identical complexion of clones
Will replace diversity of the design

For monopolisation of perfection
Their production will be common
Our genesis is gonna be left
In the form of forgotten molecule
