### "Miserable"

You have everything you need

You could part the open seas

I would peel off all my skin to keep you warm at night.

Blood is running through my eyes

And mixed with tears that you've inspired

While out drinking with your friends

A boys been robbed of life

And do you ever think of losing sleep?

Well I know you will

And have you ever dreamed of facing me?

Well I know you will and I'll finally say.

"You're miserable"
