Love me to death my darling until the end  
Love me to death I want to dream forever

You have come in the shadow of love  
It wants you until the death  
Our fate is in your eyes  
Our fate is in your eyes

We will fly between the hell  
And the heaven without being touched  
Our love will not die  
Our love will not die

Love me to death my darling until the end  
Love me to death about the rest we don't care  
Love me to death my baby take my hands  
Love me to death I want to dream forever

I want to kiss your lips my love  
666 times  
For this one an after life  
For this one an after life

You have come in the shadow of love  
It wants you until the death  
Our fate is in your eyes  
Our fate is in your eyes

Love me to death my darling until the end  
Love me to death about the rest we don't care  
Love me to death my baby take my hands  
Love me to death I want to dream forever
