That thought never cross my mind
That you could leave
And vanish into nothingness
Left us alone

I shall never forget the moment that I heard the news
of you
Nothing gonna be the same again
I never thought that all the problems you kept in had a
glimpse of truth

These words and these melodies I write for you
Inscribed in our hearts we scream for you

You never be alone again
Cos this serenade I sing for you
Will be your guardian angel
Watching over your endless sleep

Every now and then your smile
Appears before me
Only then I realize it's all just a dream
Your ghost still linger upon us
As it watches over
My every step

These words and these melodies I write for you
Inscribed in our hearts we scream for you

You never be alone again
Cos this serenade I sing for you
Will be your guardian angel
Watching over your endless sleep
