A day in L.A. and millions of faces
Looking for movement
'Cause everything's stuck
And everything's frozen
And everyone's broken

And nobody moves
And everyone's scared
That the motion will never come

This is the incompleteness
Stuck in a line

Love is a movement
Love is a revolution
This is redemption
We don't have to slow back down

Stars are alive, they dance to the music
Of the deepest emotion
And all of the world is singing in time
As the heavens are caving in

Mysterious ways
Why God gave his life
To put motion inside my soul?

It's bigger than cold religion
It's bigger than life

Love is a movement
Love is a revolution
This is redemption
We don't have to slow back down

We're starting now
We're starting now
Yeah, we're starting now
We don't have to slow back down

Yeah, yeah

This is a revolution
This is a revolution

Love is a movement
Love is a revolution
This is redemption
We don't have to slow back down

Love is a movement
Love is a revolution
This is redemption
We don't have to slow back down

Love is a movement
Love is a revolution
We are redemption
We don't have to slow back down

Love is a movement

Get up, get up, love is moving you now
Get up, get up, love is moving you now
Get up, get up, love is moving you now, get up, get up
