### "Today"

Today - I took it from you  
Today - gave it back too late  
Today I know I need you/face it without you  
Today I threw it all away...

Spoken words from those days far behind echo  
through my head  
Endless loops like a shivering sign show me to regret

I learned from you - lived for you - needed you always  
I took from you - weakened you... You

Feel a wave of your warmth that you gave and I lost it  
all  
Now this emptiness is all that will stay - on a faceless  
wall
