Wastefulness - the inconvenience of our passions  
Thoughtlessness - too many things we have in mind  
Spitefulness - could be our hidden motivation  
Or just thanklessness

Infallibility - what we claim but never can reach  
Plasticity - the human wish to rule it all  
Insatiability - we're the animals of greed  
Fucking apologies - what the hell we're waiting for...

Here we live! Here we lied!  
Here we failed and finally here we'll die!

Ignorance which is so suitable for excuses  
Negligence - we yet abused a thousand times  
Short-sightedness is the blindness in our visions  
Seasoned with irresponsibility

The clutch of long lost sympathy for conscience calls  
And a precise emergency affects us all  
Now it's an iron certainty this way must end for sure  
This - with a certain irony - we still ignore

Ignoring full of competence what we don't know  
We rather lost our common sense - this, time will  
show  
And with a sad indifference we state explicitly  
That we can't judge the consequence for humanity!

Times's changed... don't we feel that?... don't we see  
that?  
... don't we fear that?... we should know...
