Rip off your mind
Give up the task
It's always a fuse to live at full blast
Step on the beat
Never look back
There's always someone dragging your neck

If nobody's lying
Nobody cares
If nobody's dying
Then nobody's scared

Call off the deal
And leave out the tracks
Fo back and forth
To hit the wrong tag
Stir up the heat
And pay back the rent
Because someday you will reach for the end

If nobody's lying
Nobody cares
If nobody's dying
Then nobody's scared

If somebody is weak, then somebody is strong
But I know that we will be saved
You'll drown in the sea and I'll choke the fire
No matter if you put it straight
When everyone's brave then everything counts
But you feel that it's much too late
Pass through the day give up all the things that you
need
Let's save them for the perfect day
The perfect day
