"More Than This"

Visit "[More Than This](#)" on MotoLyrics.com

I walked the earth all over just to be with you. I burned a thousand bridges just to swim you through. Taken by all the seasons waiting for your storm. Lay back on all your reasons so they keep you warm, Not someone who gave up. You wanted so much more than this, Not someone who gave up. Who know there's more to life than this. I watched so many trials hoping you were wrong. Your light could shine for miles leading me along. If nothing lasts forever least we had our day. No one can take you never wish your soul away.
