

Synthetic Delusion "Limit Break"

Visit "[Limit Break](#)" on MotoLyrics.com

Now you will see, the real me
Infinite waves of hate everyday run though my body
rotting probly blood clotting not stopping me from
snapping and losing all
My time has come,
All I will be, is still in me, all I have been, until the end,
I'll will exceed my enemies, I will break myself
Killing - myself - to - make - these - changes
I will not stop the time is now
I need more patience
I will not stop the time is now
Losing my patience
Never wanna make enemies with me these feelings
bringing hate times thirty burning, learning, hurting far
as im concerning all my former friends can drop dead,
Is it a joke, to live in hope, is it a dream, to be happy,
can't place the blame on anything, I will break myself
But there's something wrong
Something wrong inside myself
I know there's something wrong
Cause im still HERE
Do you know who you are?
I think that you don't know.
Do you fear who you are?
I think that you don't know.
I'm still here
Pushing purging everything I've ever been to re-invent
just who I am with no depressionno exceptions
repercussions breaking limitations
Never gave up, so here I am, a brand new strength, to
prove it all, it's poison to my enemies
I will break myself
Killing - myself - to - make - these - changes
I will not stop the time is now
I need more patience
I will not stop the time is now
Losing my patience
