You better leave before the rush hour starts
How I wish this dawn would never end
It's so hard letting go, but I want you to know
'Til we are together again

The other me will stay with you
Loving you each moment we're apart
So don't you worry
Wherever we may be
The other me will never leave your heart

When you are here, the world disappears
Like you lived a long time in one day
No, you won't see cry when you say goodbye
Even when you're far away

The other me will stay with you
Loving you each moment we're apart
So don't you worry
Wherever we may be
The other me will never leave your heart

[Piano solo]

Ooooh, ooh... ohh... whoa...
Aah... ohhh... ahh...
The other me will never leave your heart
