Well I have a home  
Longing to roam  
I have to find you  
I have to meet you  
Signs of your face  
Slowing your pace  
I need your guidance  
I need to seek my

Innervision(x2)

My pupils dance  
Lost in a trance  
Your sacred silence  
Losing all violence  
Stars in their place  
Mirror your face  
I need to find you  
I need to seek my

Innervision (x3)

It's never too late to re-invent the bicycle  
A smile brings forth energy  
Your life giving you force

Vision

There's only one true path in life  
The road that leads to all leads to one

There's only one true path in life  
The road that leads to our hearts

Vision  
Innervision

Your sacred silence  
Losing all violence
