it feels so good, wish you dancing on me
not on the, i believe with in nobody else
how you make me say sugar honey ice tea
no i would i, put you on my shelf, who
she can be my shining star,
oh, the night would be heavenly blessed

uhh, she is so fly and i love everything about her
and i can't see myself just leaving this club without
her
they say she's independent, one second her,
oh
i want her, i need her, if she chose me, i will never
leave her

got me right, lights, camera, action, you got the
spotlights
hey, we just met tonight
and i'm thinking where have you been all my life
girl it ain't time out, you could turn me into a
rider
uh, enemy
raise me up, pass me my lighter

uhh, she is so fly and i love everything about her
and i can't see myself just leaving this club without
her
they say she's independent, one second her,
oh
i want her, i need her, if she chose me, i will never
leave her
and i'm ma break her down, break her down for
come here girl, whoa, ah, whoa

come on somebody, gotta come on
hey, come on let the horns play
come on let the horns play
come on, somebody.
