Slide down the banaster
You know i've got a brand new world
Tied to the bed again
You're never gonna lose me girl
Jump on the nightmare
Come and feel the way i make you shine
Lay by the death of me you know you had to do this
sometime
It's so good to see you alone
I never get too tired of you
Oh no never do
Overblown again
I'll tear your body electric
Suffer your fantasies
I'm really gonna take you down under the whip you get
I'm never gonna let you out
Lay by the side of me
The mourning of a brand new day smile for the sick of
it
You know you had to please me some way
It's so good to see you alone
I never get too tired of you
Oh no never do
Overblown again
I'll tear your body electric
