# "Life On Planet Earth Is Fucking Cancerous"

Visit "[Life On Planet Earth Is Fucking Cancerous](#)" on MotoLyrics.com

So much shit is cancer causing  
Do what you want without pausing  
Another fucken toxic spill  
How many people will it kill?  
The kept it hidden from the press  
We don't know but it were in distress  
Another fucken nuclear test  
Then we breath it through our chest  
To this we've exposed for years  
It's no surprise to me  
It's affection everyone  
But people are too dumb to see  
So many things can fuck me up  
That I don't give a shit  
I'll live my life the way I want  
And nothing's gonna make me quit  
Radon comes from the underground  
For years we never heard a sound  
What's the next thing to be found?  
How long will it be around?
