

Default "Made To Lie"

Visit "[Made To Lie](#)" on MotoLyrics.com

It's late again
Across the bar her night just began
Her search will end
She spots her tonight friend but then

She's been made to lie
She's out of the airwaves and into the spotlight
She can't make it right
There's got to be some way to bring back her first sight

She woke up alone
While he slept she took off for home
Left a note by the phone
No number or name to be shown but then

She's been made to lie
She's out of the airwaves and into the spotlight
She can't make it right
There's got to be some way to bring back her first sight

Day to night
Never ending fight
Trapped forever alone

She's out of the airwaves and into the spotlight
She can't make it right
There's got to be some way to bring back her first sight

She's been made to lie
She's out of the airwaves and into the spotlight
She can't make it right
There's got to be some way to bring back her first sight
