Powers in numbers some people say
Have people behind you and do it your way
Give people something they want to believe
But is this right, it is truth or deceit?
Mass communication
Will spread your word
Go speak your mind
You will be heard
Some are determinated to rule the world
Some are looking to make some bucks
Playing it off as if their superior
And no one gives, gives a fuck
Preach to the weak-hearted
Bring out their love
Tell them what they want to hear
As you stand above
Preach to the weak-minded
Bring out their hate
Sovereignty will over rule
And soon you'll meet your fate
So many people you can delude
Those who fucked it up were crude
Too much money or too much power
As we watched their shit go sour
Too much money too or much power
As we watched their shit to sour
