I'm not afraid to show emotion
It's what I need to get me through
And I would swim across the ocean
A thousand miles to get to you

Maybe I'm crazy but I
Feel for once in my life
Like the stars in the sky have all aligned
I never will deny that
You and I

We will live forever
Love each other
Die together
How could we deny what feels so right
We will live forever
Love each other
stay together
Isn't that the way that life's supposed to be
Supposed to be

I used to think that my obsession
Was just a phase that I'd go through
Now I know without a question
You're the one I always knew
I know it's crazy but I
Feel for once in my life
Like the stars in the sky have all aligned
I never would deny cuz
You and I

We will live forever
Love each other
Try together

How could we deny what feels so right
We will live forever
Love each other
Stay together
Isn't that the way that life's supposed to be

When it feels like

It couldn't be better
When it feels like
No one else could take your place
When you know you have the answer
I never will deny
Cuz you and I

We will live forever
Love each other
Try together
How could we deny what feels so right
We will live forever
Love each other
Stay together
How could we deny what feels so right

We will live forever
Love each other
Try together
How could we deny what feels so right
We will live forever
Love each other
Stay together
Isn't that the way that life's supposed to be
