"Vestige Of Earthly Remains"

Visit "[Vestige Of Earthly Remains](#)" on MotoLyrics.com

Decline of the human empire
Mass existence has expired
Disintegration in a flash of light
Wreckage is what is left in sight
The scars of life are left behind
What has happened to mankind?
Now our world is left in rubble
We should have know we where in trouble
Vestiges and decay
The earth is left this way
Ashes the only trace
Now a lonely place
Shifting through remains
Nothing here to gain
Lifeless barren zone
And I'm here left alone
Human life is overthrown
Look at what I once called at home
This planet seen is left demolished
Entity is now abolish
Elimination we have achieved
From the power of mass greed
Ruins here and that is it
Earth is left a pile of shit
