### "What You Need"

Visit "[What You Need](#)" on [MotoLyrics.com](http://MotoLyrics.com)

What you need girl, what you need  
What you need girl, what you need  
What you need girl, what you need  
What you need girl...

(Listen) One chance left, to save us, free the most  
fortune favors  
I'm focused on my vow, it's only you right here right  
now  
I want to be with you nightly, don't take what I'm telling  
you lightly  
Cause I like ya' and you like me so let's not play around

Don't you worry about them other girls  
They don't really mean a thing to me, no  
I'm just trying to be what you deserve  
I'm just trying to live a life so tell me

What you need girl, what you need  
What you need girl, what you need  
What you need girl, what you need  
What you need girl...

We should be together; Edward & Bella  
Be by your side, Bonnie and Clyde  
I give you everything because of who you are  
I'll put you in the spot-light, you're a superstar  
I just wanna be with you nightly, don't take what I'm  
telling you lightly  
Cause I like ya' and you like me so let's not play around

Don't you worry about them other girls  
They don't really mean a thing to me, no  
I'm just trying to be what you deserve  
I'm just trying to live a life so tell me

What you need girl, what you need  
What you need girl, what you need  
What you need girl, what you need  
What you need girl...

I'm just tryna tell you baby you're the only who's on me  
We can do whatever that you need, call me homie  
We can fly wherever you ain't never been before  
We can go to the store buy anything that you want  
Then we can take sprees, you know down to your knees  
Shopping sprees all over the place, baby call me

And we can do it baby, just tell me  
If you need it babe

[2x]

Don't you worry about them other girls  
They don't really mean a thing to me, no  
I'm just trying to be what you deserve  
I'm just trying to live a life so tell me

What you need girl, what you need  
What you need girl, what you need  
What you need girl, what you need  
What you need girl...
