It was a late night on the dark side of town
She fled to find her dreams
She took the next line of a thousand miles
Nothing could stop her it seems

Stars in the sky
Guide her into the madness
Blood on the line
Promise you the sky

She's living in the spotlight
Out of the night
Living on the edge
Under the spotlight
Out of the night
Living on the edge

It was a cold night in a small southern town
He said his last goodbyes
He took his six string and a will of fire
And left it all behind

He's got a rage
Lonely hearts beware
Flames in the sky
Burning in his eyes

He's living in the spotlight
Out of the night
Living on the edge
Under the spotlight
Out of the night
Living on the edge

Spotlight
Out of the night
Living on the edge
Under the spotlight
Out of the night
Living on the edge

Oh, she's got a smile
Camera's in her eyes
Stars in the sky
Now who's next in line?

They're living in the spotlight
Out of the night
Living on the edge
Under the spotlight
Out of the night
Living on the edge

Spotlight
Out of the night
Living on the edge
Under the spotlight
Out of the night
Living on the edge
