the right to work for some else is self imposed slavery
a will degradation of ones self what kind of right is that
there is no way in hell! i will do this for the rest of my
life
worthless wage slave making someone else rich

[Chorus:]

the mainstreams of existence are made unafordable
and alternative means are then made illegal

and so were forced to play a game in a vicious circle

a game of oppression, munipulation and slavery
under the threatning shadow of being thrown in jail
or living a life of misery starving on the streets
