[Music: Harrington / Vander Ende]

[Lyrics: Esquivel]

Step back and listen to what I say  
Don't worry, put your trust in me  
What to believe when your  
head's overfilled with these lies  
The naked truth separates the  
people lost in time

[Chorus:]

As if  
There's nothing to do  
Reach back  
And pull your past through  
Step back and listen to what I say  
[Repeat chorus]

What to believe when your  
head's overfilled with these lies  
The naked truth separates the  
people lost in time

I see the future. I see your life  
I see you live your life on  
borrowed time  
You live for your own morals  
I do what I like 'cause this is my  
life

I do as I please  
With no sacrifice  
Guess what ? Step back

[Repeat first verse, chorus]

Step back and listen to what I say  
Step back
