Turn in chapters one and two, write me a paper on how
to be "successful".
You can take all of this to the trash where they belong.
I am told to endure.
It will get better as time passes.
This is only preparing us to become adults.
What more is it that you want?
What we feed them what they wait, you play the game.
I am told to endure, That it will get better as time
passes.
This is only preparging us to become adults.
The only solution is to take it with a grain of salt.
Try your best but don't let it get you down.
Try your best. it's never enough.
They keep pushing you while all eyes look down on you.
Try your best but don't let it get you down.
Try your best but don't let it get you down,
Drain me of life(x3) Drain me of life.
All for a letter(x2)
This paper means nothing to me
Except that I have beat you and your pathetic game.
This paper means nothing to me except I have beat
you.
The only situation is to take it with a grain of salt
How to be successful is not defined in any book or
classroom.
I use this as a model for my life
