Run run away
Run run away

Standing on a limb
Your in for a ride
Feeling every heartbeat
It's on tonight

This great fade in between us
It's all around
(Around)

I play a major role
I
Need you to feel me from inside
They come to the surface
Open your eyes

I'm in your head
You will swallow

Run run away
Run run along
Run run away
You're on your own
Run run away
Run run along
Until you're gone

The pirate is coming
Now it's time to pay
You've gone to far
You're in my way

I set you free
And now all the pain will be lost

I'm in your head
You will swallow

Run run away

Run run along
Run run away
You're on your own
Run run away
Run run along
Until you're gone

A lesson learned
It's all right
But you will never see the way
Please don't deny

It was me you wanted to blame
You can't let it alive
You can't let it alive

I'm in your head
You will swallow

Run run away
Run run along
Run run away
You're on your own
Run run away
Run run along
(Until you're gone)
Until you're gone

Run run away
Until you're gone

Run run away
Run run along
