"Keep Your Enemy Closer"

I saw your fake expression
You hide something behind
I can see your little game
You're just a piece of shit

How could I have trusted you?
I have treated you as if you were family

Sacrifice moments to help you
When I turn my back
I feel the dagger rip my flesh

I should see it coming
Expected something from you
You should have never got me on your side
Now we are enemies

I did one mistake
To enter you into my world
My last mistake
I will never repeat it again

Die in pain
You mother fucking shit cunt

You hypocrite scum,
You shall regret your act
You hypocrite scum, fuck you and die
