Slow death, insanity in inflamed brain.  
This is peak of deformity - world's pain.  
Terrible war. Devils machine.  
Misscarriage of the dying age.  
Be afraid of big destruction of senses,  
Of life and total repulsion.  
Life in fear - mortal way through your  
Fucking future day.  
Suicide will become your escape!  
Life encumbrance. Dreadful death day.  
No more moment. You will die!  
Morbid science will create ruthless  
Creatures - fear and hate.  
Blood and flesh in dampness of grave.  
You're embodiment of death.  
Burning ache! My eyes! Dry air!  
Dreadful sentence - judgement by fire!  
Death - a winter of nuclear blast.  
Sacrifices of hell machine without  
Laws - we lost our feelings.  
Evolution of gory Earth is dead  
And what do you want?  
You just tried to escape from yourself  
But you stumbled and you died.  
Dreadful war - slimy gore.  
Sacrifice of brain drive.  
Take my hand with slave brand.  
It's my future. Crazy future!  
Vile future! Fucking future!
