She's all alone
She's on her own
When someone calls her on the phone
She says she isn't home
She hardly touched the ground
The ground she walked upon
So scared to be around
So scared to be around

[Chorus]

She's only 20 and it won't take long
She's left her family and she's left her home
Can't you help her, can't you help her?

These things are real
These things she thinks she feels
But it's the only way
You can't ignore today
Someday she'll know
She's trying to grow
That she is not alone
It's going alone

[Repeat Chorus]

She's only 20 and it will take time
Before she learns that growing up's no crime
Can't you help her, can't you help her?

'Cause soon the nights will find a way
She's all alone
She's all alone
Someday she'll know
When she's trying to grow
That she is not alone
It's going alone

[Repeat Chorus]

She's only 20 and it will take time
Before she learns that growing up's no crime
Can't you help her, can't you help her?
