"I Cried"

I cried, I cried my heart full of misery
I cried, & now it's your turn to cry for me
So many days gone by, so many days gone by
But all, all, all I could do was cry

(male scat singing, with flute accompanying)

You keep me, you keep me in pain
But I promise you I'll never, I'll never love again
I cried over you, I cried over you
You know that I've always, I've always been true

(spoken):

Now listen. Turn your record player down real low. So listen.

You know that I, I'm only human
So now, if you see him, I want you to tell him:
Don't make me over, 'cause any day now
You know that everybody, I said that everybody
Everybody loves lovers
...& fade
